## **1 In This Release**

This is the 02.11.09.XX release of EDMA3 Driver and contains libraries, sample initialization libraries, standalone sample applications and support documents.

This release contains sample OS adaptation layer for BIOS 6, which could be used by BIOS 6 based applications.

## 2 Out-of-Box Contents

edma3\_ild\_02\_11\_09\_08.tar.gz contains following:

1.
  - Source code for EDMA3 Resource Manager, Driver and other necessary abstractions.
  - Project files (DSP/BIOS™), CCS4 build files, XDC package.bld files (for supporting getlibs function) and all Makerules and Makefiles, to build EDMA3 package in host environment. Please note from this point of time, libraries can be built using Makefiles only. Hence libraries need to be built through command prompt using gmake command (Please refer the user guide available with this release for detailed build instructions).
  - The above mentioned items are located inside the <installation dir>\edma3\_ild\_02\_11\_09\_XX\ directory.
  - Please note that the CCS setup files and GEL files are NOT provided with this release and this would be available with latest CCSv4 releases or from EVM manufacturer.
2. Release Notes (this document) providing an overview of this release.
3. User Guide and data sheets.
4. EDMA3 Driver API (generated) documentation in CHM format.

### 3 Known Issues

<b>1.</b>	<b>Instrumentation (all components)</b>
<b>Release Note</b>	
Instrumentation code is not yet implemented as the XDC/CCSv4 version at the point of development did not support RTA and instrumentation APIs.	
<b>Workaround</b>	
None	

<b>2.</b>	<b>EDMA3 hardware doesn't works properly in FIFO mode with all the controllers.</b>
<b>Release Note</b>	
Very few peripherals support EDMA3 FIFO mode. EMIF controller doesn't support the same. So EDMA3 CANNOT be used in FIFO mode for doing a mem-2-mem data transfers, EDMA3 being configured in the FIFO mode. Applications trying to use EDMA3 in FIFO mode should first check their respective peripheral-controller document for this mode support.	
<b>Workaround</b>	
None	

<b>3.</b>	<b>PingPong Example Fails for certain EDMA instances for some DSP cores in Release mode only.</b>
<b>Release Note</b>	
PingPong example fails for certain EDMA Instances for some DSP cores in Release Mode only. It passes in the Debug mode.	
<b>Workaround</b>	
None	

<b>4.</b>	ARM 9 support for OMAPL138 is not available on Make based build of EDMA3LLD
<b>Workaround</b>	
None	

<b>5.</b>	The following IR is raised on this release.
<b>IR# SDSCM00039169</b> EDMA3 Example fails for following Big Endian Simulators: tci6608-sim/tci6616-sim	
<b>Workaround</b>	
None	

#### **4    Limitations**

None.
