# SA 3GPP Enabler version 03.00.00.00

## Overview

This document provides the release information for the latest Security Accelerator Sub-System (SASS) 3GPP Enabler Module. This module contains the API function to enable 3GPP related functionalities at SA sub-system that should only be used by those with ETSI licensing as described at <http://www.etsi.org/services/security-algorithms/cellular-algorithms>.

SA 3GPP module includes:

- Compiled library (Big and Little) Endian of SASS 3GPP enabler.
