

GSMWBAMR Codec on DM6467

Version 1.10

Release Notes

November 2007

Build ID: 1.10.001

The release note is divided into the following sections:

- [New In This Release](#)
- [Validation Information](#)
- [Fixed In This Release](#)
- [Known Issues](#)

New In This Release

- Migrated to Code Generation Tools version 6.0.7
- Corrected the stack memory size in datasheet

Validation Information

Release Configuration	Description	Validation Platform
GSMWBAMR_DM6467	GSMWBAMR Codec on DM6467	DM6467 EVM [Datasheet] [User Guide]

This release is validated on the following:

- DM6467 EVM
 - Code Generation Tool version 6.0.7
 - Code Composer Studio version 3.3.38.2

Fixed In This Release

- None

Known Issues

Defect ID	Description	Applicable Release Configuration
None	QualiTI xDAIS Compliance Tool - Sanity Test 5 (the external symbols <code>IMOD_PARAMS</code> must be present for the algorithm to be tested) failed. This is because as per XDM, there is no default global <code>PARAMS</code> structure. However, all critical tests (like multichannel, scratch contamination, interrupt, buffer relocation and table relocation) have passed for GSMWBAMR on DM6467.	GSMWBAMR_DM6467
